# WATER FILTER

## BWT PARTICLE WATER FILTER PROTECTOR

30-Micron Mechanical Water Filter for Espresso Machines

Compact Backwash Filter for Cold Water

Used for pre-filtration before a water softener.

The filter element captures mechanical, insoluble particles as small as 30 microns, such as rust and sand, and also protects the system from corrosion.

A direct backwash system is used to clean the filter element from impurities.

The filter element should be backwashed at least once every two months.

**Made in Austria**

## BWT WATER FILTER CARTRIDGE BESTMAX M

Universal filter system for water optimisation in the gastronomy sector  
Protection of the machine technology against limescale deposits, particles, off-flavour components and chlorine

Simple installation via universal BWT besthead FLEX connection technology

Economic use for any water requirements thanks to numerous filter sizes

Space-saving design that is very easy to handle

Ensures best protection of technical equipment and the quality of all products made using it

**Made in Germany**

## BWT INLINE PRESSURE REDUCER 2 - 8 BAR

Complete your Set-Up with the BWT Inline Pressure Reducer. This inline valve can be used to reduce incoming pressure to your espresso machine or water filtration system.

The reducer can be used to regulating incoming pressure between 2 - 8 bar and includes an F 3/8" BSP fitting so it can attached directly to your BWT Bestmax Filter Head. Also included is a 10 bar gauge to monitor line pressure so that you can adjust as necessary. A must-have accessory for anybody who wants to plumb their espresso machine.

Each pressure reducer ships with the following items included:

## BWT WATER FILTER CARTRIDGE BESTMAX M & BESTHEAD FLEX

Discover the BWT Bestmax M with Besthead FLEX, a comprehensive and versatile water filtration system ideal for the diverse needs of the gastronomy industry. This system is engineered to provide exceptional water quality for coffee machines, vending machines, and even for generating pure steam in ovens and combination steamers.

About BWT Besthead FLEX: The BWT Besthead FLEX filter head incorporates cutting-edge FLEX connector technology, making installation straightforward, even in tight spaces. Its adjustable angle settings ensure optimal hose orientation, maximizing space and ensuring secure connections without additional fittings. Designed for global use, the Besthead FLEX and its components are crafted from food-safe materials, suitable for all drinking water systems.

Inclusions:

BWT Bestmax Water Filter Size M (1 unit)  
BWT Besthead Flex (1 unit)

## BWT WATER FILTER CARTRIDGE BESTTASTE 15

Introducing the BWT Besttaste S filter cartridges, specifically designed to enhance the quality of water for vending machines, coffee machines, and water dispensers. These filters effectively remove any particulates and unpleasant off-flavors and odors, ensuring that both cold and hot beverages dispensed reach their optimum flavor. This enhancement is crucial not only for beverage quality but also for improving the sensory characteristics of water from dispensers.

The BWT Besttaste 20 filter cartridges feature integrated pre-filtration, making them ideal for use upstream of BWT Bestaqua ROC reverse osmosis systems.

## BWT WATER FILTER BESTAQUA ROC COFFEE

**Universal water optimization for coffee production**

Efficient water optimization for the preparation of coffee and espresso  
 Standardized water for coffee, can be reproduced worldwide  
 Universal solution for every typical raw water and high water requirement

The coffee machine is safely protected against deposits such as limescale and gypsum

Perfect interaction of reverse osmosis and BWT magnesium technology for remineralization

Resource-saving plug-and-play technology – unpack, connect and get started

The system can be easily controlled via the smartphone app.

\* Membrane and BWT bestaqua 14 PREMIUM included inside the system
