LAQTIA Q RANGE FOR HORECA

Our range of custom products includes Q products that are especially designed for HORECA channels and the final customer.

ABOUT US

We are a family-owned company specialized in the development, manufacture and marketing of top-quality instant beverages for vending, dispensing, HORECA and final consumers.

VISION

Laqtia aims to be globally recognized as the benchmark company for quality instant beverages sector by consumers, employees, customers and suppliers, including all stakeholders related to the company's activity.

OBJECTIVE

LAQTIA wishes to enhance people's well-being through instant drinks, by maximizing the quality of its products and generating value for both society as well as the company through its business practices.

QUALITY AND INNOVATION

The innovation of our products is a strategic necessity for LAQTIA; therefore, we work with the best professionals for creating products and new recipes in order to satisfy the expectations of our customers.

VALUES

Commitment to sustainable business practices that protect the environment for future generations.

Serving our consumers by continually challenging ourselves to achieve the highest levels of quality in our products while never compromising food safety standards.

Understanding and focusing on what provides value to our consumers in order to deliver this value in everything we do.

Commitment to strong work ethics, integrity and honesty, as well as to compliance with the applicable law and with LAQTIA's principles, policies and standards.

LABELS

SIN FREE

This label identifies products that do not contain any preservatives nor artificial colouring in their composition.

CLEAN LABEL

The clean label refers to a clear, clean and comprehensible declaration of foodstuffs, assuring that the list of ingredients is free from incomprehensible terms as well as artificial additives.

EU

Identifies that the product is fully manufactured in the European Union, as a whole with reference to both its origin as well as production.

NO ADDITIVES 0%

In order to be considered as unprocessed, the absence of substances known as additives is a necessary condition. Additives are added in order to maintain or enhance food safety, freshness, taste, texture or appearance.

MILK AGGLOMERATED PRODUCT

Clumped milk is obtained from pasteurized milk through an atomization process that evaporates water content from milk, resulting in a white powder that preserves the properties of milk and which transforms back into liquid milk when mixed with drinking water. The principal purpose of the agglomeration process is controlling the porosity and density of the materials in order to determine properties such as dispersibility and solubility.

GLUTEN FREE

If you are following a gluten-free diet, the presence of this product label indicates that the food is suitable for the diet of people with gluten intolerance. It means that the product does not contain more than 20 particles per million of gluten.

SYMBOLS

BEST SELLER

The most sought-after items from our product range.

RETAIL

Specifically designed articles for sale in large retail chains, shopping centres, supermarkets and smaller shops. These companies market the product directly to the final consumer.

MINIMUM ORDER

Our sales representatives will be happy to advise on the minimum quantities required for making a purchase order for these products.

VENDING

Sale of products through automatic vending machines.

HORECA

Products specifically designed for hotels, restaurants and cafeterias.

Laqtia

H O N E S T I N S T A N T D R I N K S

OUR QUALITY GUARANTEE

We offer our customers the highest standards of quality and product safety. To this end, we regularly pass internal audits for endorsing our quality labels: IFS food and Global Food Safety Initiative (GFSI).

LAQTIA INSTANT BEVERAGES AND MORE

We offer a wide range of products for vending and dispensing machines, OCS, hotel catering, and final consumers. A wide variety of top-quality instant beverages divided into different ranges. Laqtia dairy range, chocolate, chai, tea, coffee, latte, soluble drinks and smoothies.

100% MILK AND DAIRY PRODUCTS

Granulated milk powder is obtained by dehydrating the product and eliminating water, thus achieving the granules that preserve all the qualities of the milk. Our powdered raw material is of the highest quality, manufactured exclusively from raw materials of European origin.

“ A 100% natural product with no artificial additives.

Our portfolio of granulated milks and dairy products includes a wide variety of products that are designed to adapt to your business needs.

BIGGER GRANULES

At Laqtia we are committed to offer different types of granulations, providing the customer with a wide range of products that adapt to specific machine dosing. The extra or bigger granules have a granule size larger than 2mm.

To get a good coffee we know that we have to take care of every step before the brewing is done in the cup.

1 SELECTION OF THE BEST GRAINS
 Selecting the best coffee origins in green to create the flavour and palate of each distinctive cup

2 GETTING THE ROASTING JUST RIGHT
 It is during the roasting stage that we develop the grain to determine the final character of the cup, depending on how we control the roasting time and temperature.

3 COMBINE EACH GRAIN TO CREATE THE BEST BLEND
 Once the coffee has been freshly roasted and just when it releases its aromas and oils, we create the blend with the different origins.

OUR ORGANIC MILK

The organic milk comes from organic farms that meet all legal requirements. to ensure animal health and welfare, respect for the environment and sustainable development, due to which there is no use of synthetic chemical products nor genetically modified organisms (GMOs).

CHARACTERISTICS OF ORGANIC MILK

The European Union has adopted very strict regulations, which are as follows:

ANIMAL WELFARE

The cows are kept in a state of semi-freedom, avoiding stables, except for when climatic conditions make it inadvisable to do so. Animals are provided with sufficient space and adequate standards of hygiene.

QUALITY OF FOOD

Feeding is carried out in a natural environment, in fields free from herbicides and pesticides, and when necessary, with the use of fodder, which must be natural and GMO-free.

MILKING

Production is carried out on a minimum scale, subject to reducing stress and production levels.

This results in higher-value milk, even though the production of milk is lesser, by optimising the cost of living and feeding conditions of the cows for the farm. But this guarantees better animal health as well as a healthy and wholesome product.

ORGANIC COCOA

At Laqtia ROOTS we select the best Ghanaian cocoa varieties, ensuring all certified quality standards.

STORAGE: Store in a cool, dry place after opening.

EXPIRY PERIOD: 18 months.

CHARACTERISTICS OF ORGANIC COFFEE

Organic coffee is produced without the use of artificial chemicals, such as certain additives, pesticides and herbicides. Its main characteristics include:

- The farmland was not exposed to any prohibited substances during the last 3 years.
- Protection between organic and conventional farming.
- Sustainable crop management plan, avoiding erosion of soil nutrients, natural pest control, combined with planting of tree species that further balance the conservation of soil nutrients in addition to providing shade and natural humidity.
